ABOUT ME

I'm a Data Science undergraduate who is eager to learn and improve my skills. I'm detail-oriented, quick to understand instructions, and committed to doing my work accurately and responsibly.

EDUCATION

2025 - Present — **BSC (HONS) IN DATA SCIENCE (TOP UP) – LONDON MET UNIVERSITY (UK)**

Currently studying with a strong interest in data analysis, AI, and practical learning. Actively developing skills in data handling, problem-solving, and applying theoretical knowledge to real-world projects.

2023 - 2024 — **HND IN COMPUTING (SOFTWARE ENGINEERING)**

Gained foundational knowledge in programming, software development, and IT concepts, with hands-on project experience.

WORK EXPERIENCE

present — **AI-POWERED WEALTH PLANNING SYSTEM (UNDER DEVELOPMENT) FINAL YEAR PROJECT**

- Designing an AI-based system to assist users in managing income, savings, and investments.
- Exploring predictive models and data analysis to provide personalized stock market suggestions.
- Gaining hands-on experience with Python, AI/ML techniques, and database management.

SKILLS

- Data Analysis
- Design Thinking
- Wireframe Creation
- Problem-Solving
- Computer Literacy
- Front End Coding
- Analytical Thinking
- Strong Communication
- Leadership
